

## MEVIA and EGLA Updates

### MEVIA: EGLA COMMUNICATIONS Updates

We have done tremendous progress on MEVIA, the message, the branding and overall improved to a responsive site our corporate image. Focusing on the CLOUD TO CABLE TV message and our mobile app, MEVIA.

### New Web Presence

We decided to build a new site to cover all technology offerings and services offered by [EGLA COMMUNICATIONS](#). The new website uses a parallax, HTML5 responsive interface with great integration to social networks, our own cloud and although released about a week ago, still is ongoing new updates, and more improvements to come.

[caption id="attachment\_1081" align="aligncenter" width="300"]

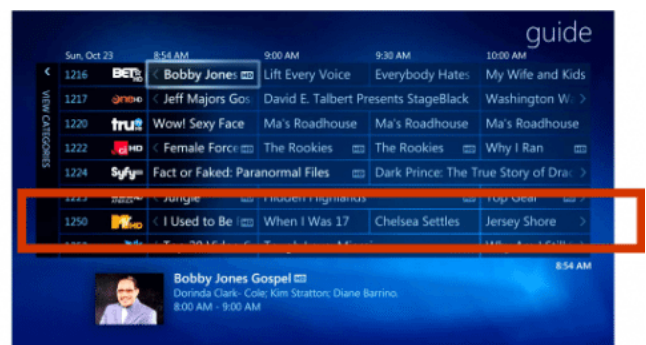

EGLA COMMUNICATIONS[/caption]

The new responsive design incorporates HTML5 Video and also provides support for Open Graph integration to Facebook and Slideshare. You can still access the old site at [blog.eglacomm.net](http://blog.eglacomm.net)

We enforced and support the following areas for EGLA that include our products in:

- CLOUD to CABLE Platform (Mediamplify)
- MEVIA Application, and
- Wireless Products

## Cloud to Cable

EGLA offers its Cloud to Cable product. Cloud to Cable is a technology that connects cloud-based platforms and all its content in HTML/Video/Music and distributes them to Cable TV systems in a seamless and effortless manner. You can then distribute the same content to mobile, desktops, and other connected devices

Cloud to Cable has enabled EGLA to distribute our music content to MSOs and cable operators around the world (<http://eglacomm.net/platform>)

Our team prepared some illustrative videos on what CLOUD TO CABLE is, and how it enables both mobile and Cable TV experiences all in one platform at an affordable rate.

The first video is in english:

<https://www.youtube.com/watch?v=80G-rh6DIns>

And a translation in spanish:

[https://www.youtube.com/watch?v=q0HETfMU\\_rg](https://www.youtube.com/watch?v=q0HETfMU_rg)

## Music for CABLE

Our CLOUD TO CABLE platform (MEDIAMPLIFY) provides us with a great place for a Music service that is offered from our platform to any Cable TV system or IPTV network. These music product is also available thru our MEVIA APP, in both Android and IOS.

Our music content is diverse and unique, we prepared a video introducing our content.

[https://www.youtube.com/watch?v=vW\\_sjBjECjM](https://www.youtube.com/watch?v=vW_sjBjECjM)

Our platform is available for licensing enabling any Music streaming service to connect with millions of Cable TV subscribers.

## TV for Cable

Just like Music, our TV/Video offering is available both for web/mobile and Cable TV. We count with 1000+ TV Channels and networks from all over the world. We offer this content to our customers in CABLE TV or thru our mobile app, MEVIA.. The TV/Movies are available in all formats and ready for distribution to your MSO or IPTV system.

<https://www.youtube.com/watch?v=csrlydZACNc>

Similarly, Cloud to Cable Video Platform is available for licensing to any TV Broadcaster. We include a playback and real-time video production for your broadcasting needs.

## MEVIA

Mevia is a great application to deliver multiMEVIA content to costumers in mobile apps or tablets, also enables the control of connected devices like the Chromecast and Apple TV.

MEVIA is our mobile app and CLOUD TO CABLE extension for smartphones and smart TVs. The MEVIA App experience is available consumers but also available to businesses and universities. The market segments where MEVIA fits are:

- Retail businesses
- Stores
- Universities
- Coffee Shops and Restaurants

You can associate your brand with Music and Video content easy with MEVIA.

In Spanish:

[https://www.youtube.com/watch?v=\\_C0KdOViiDA](https://www.youtube.com/watch?v=_C0KdOViiDA)

In English:

## **MEVIA SAFETY**

This is part of our feature set for LATAM, an announcement on platform and services will be done soon. We use our own custom Bluetooth Low Energy button to support MEVIA Safety features on MEVIA. Quickly send your current GPS location to a friend or family member in case of emergency or simply asking for assistance.

Envíe su localización de GPS al presionar un botón de Bluetooth

## Wireless Products

Our Wireless Products Portfolio was revamped and stylized with:

- MobileCAD (<http://eglacomm.net/mobilecad>)
  - MobileCAD with RF Simulation (<http://eglacomm.net/mobilecadrf>)
  - MobileIPP Protocol (<http://eglacomm.net/mobileipp>)
-
