

Music for Cable Re-Launch

Music for Cable and CLOUD TO CABLE

Sites Relunched: cloudtocable.com, cloudforcable.com, musicforcable.com and ubiquicast.com

Cloud to Cable enables a music or video streaming service to be delivered to CABSAT systems. Our platform can cover 10, 50, 100+ music or radio channels that are directly obtained using

your HTML5 web interface and sent directly to a Cable TV System and to subscriber's set top boxes.

A “[MediaPlug](#)” server appliance is provisioned with our cloud-based VM with our proprietary software, connecting to a streaming service. As an example we have created “MEVIA & Mediamply Music” a Cable TV offering also available for Cable/Satellite systems. [Read more](#)

Music for Cable TV is then as quickly as signing a partnership agreement with EGLA COMMUNICATIONS and creating a selection of stations for CABSAT. Licensing should be fast an easy to obtain directly from SoundExchange, BMI, ASCAP and other providers.

We will power your music streaming service and protect all your content with appropriate Digital Rights Management (DRM) as suggested by the industry using encrypted and authenticated secured lines to our cloud or yours directly. [Read more](#)
