

Cloud to Cable Patent Issued & Inventors Protection Act Updates

Patent Issued for One of Our Media Streaming Technologies

As you have read in my blog, Cloud-to-Cable is a platform and technology that merges the worlds of cloud and Cable TV.

One of the main objectives of the patent and as you can read in the description is to:

*" systems, devices, methods, and non-transitory computer-readable media for media delivery from a cloud or IP-based distribution network, or CDN (Content Delivery Network) to MSO (Multiple System Operators) or head-ends that include cable and satellite delivery mechanisms. **The present technology unifies cloud-based delivery (Mediamplify cloud) with the cable-based mechanism (e.g. Comcast, Verizon FiOS).**"*

<https://www.slideshare.net/edwinhm/what-is-cloud-to-cable-tv-mevia-platform>

I filed for patent protection in the US and Europe for the methods and system called: "**Method, system, and apparatus for multimedia content delivery to cable tv and satellite operators**" now protected under **US Patent 10,123,074** that will be published and formally issued on November 6th, 2018. This patent protection gives me the exclusive rights in the US, and we are applying to Europe and other countries, for our method and system to broadcast TV and Music stations on Cable TV, OTT, IPTV, and other MVPD systems. The technology in place is in use by our [Music for Cable](#) product and is now branded under [MEVIA : Cloud to Cable](#). The patents are owned by me and are available for licensing, including all specifications, and software to create our broadcasting network appliance ([MEVIA Network Appliance](#))

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

Ted Deutch - Boca's Congress Representative on HR.6557 - Inventors Protection Act

Ted Deutch is a well-known congressman that represents the area where EGLA COMMUNICATIONS is located, and after sending some emails to Mr. Deutch regarding how the new system in place for patent enforcement is no longer favorable for innovation and on the contrary is an incentive to steal technology and use it without paying royalties. The HR. 6557 is a new legislation called "Inventors Protection Act" that aims to assist and help inventors protect their Intellectual Property after their patents have been issued by the USPTO.

Let's recall new changes made in the USPTO regarding software patents, specially Alice and American Invent Act changes made, not forgetting IPRs and the PTAB processes now in place.

EGLA is glad to see our Congress react and move in the right direction and we are hopeful these efforts will fructify soon.

Dr. Edwin Hernandez
751 Park of Commerce Dr Ste 128
Boca Raton, FL 33487-3623

Dear Dr. Hernandez:

Thank you for contacting my office regarding H.R.6557 - Inventor Protection Act. Your views on this issue are important to me, and I welcome the opportunity to respond.

Giving inventors this right and the ability to protect their creations provides powerful incentives for innovation. The framers of the Constitution considered the ability of inventors to protect and exploit their discoveries as so essential that they recognized the authority to protect intellectual property, including patents, among the few enumerated legislative powers granted to the federal government.

As you know, this bill provides a series of protections for inventors when their patents are infringed. For one, it shifts the burden of proving irreparable harm away from the inventor by creating a presumption of irreparable harm upon a finding of infringement. It also expands the choices of venue where an inventor may file an infringement suit and provides for expedited judicial proceedings.

This bill has been referred to the House Committee on the Judiciary, on which I serve. Please know I will keep your views in mind should this bill be debated in Committee or on the floor of the House.

If you would like to be updated on these and other issues, please stop by my website (www.deutch.house.gov) and sign up for my electronic newsletter. I hope you will find these tools to be valuable resources in keeping up with events in Washington and South Florida.

Sincerely,
^
Ted Deutch
Member of Congress

TD/df

A few years back our team received a visit or this congressman at our offices in FAU - Research Park, before we moved to the [EGLAVATOR](#).
