## Teaching Experience

**Teaching Assistant for Mobile Computing, University of Florida**, Spring/Fall 2001

**Experience:** Mobile Computing is level-6000 graduate class. The class involves the discussion of research papers and a practical section where different wireless technologies are covered. In addition to my job duties, an automated examination tool was developed as additional class aid for grading. The class required J2ME/JSEE knowledge and the ability to support the class with Motorola smart phone development, plus all additional aid required to run the killer application competition sponsored by Motorola.

**Teaching Assistant for Software Engineering, University of Florida**, Fall 2000

**Experience:** The class was targeted to computer engineering seniors as an introduction to the software development cycle. Students carry-on a web-based project and deliver specific documents and specifications (architectural, design, UI), develop a prototype, schedule different tasks, and manage the project to be delivered on time. The TA assists technically and supervises their work, grades quizzes and exams

**Teaching Assistant for Introduction to CIS/Java, University of Florida**, Summer 2000

**Experience:** I taught an introductory lab session, graded quizzes, exams, and assignments. As an assistant I held different tutorial sessions on object oriented concepts and problem-solving skills.

**Teaching Assistant for C++, University of Florida**, Spring 2000

**Experience:** Grading and preparing assignments for the class.

**Instructor at the Central American Internetworking Conference**, Sep'98

**Experience:** During the conference, I taught a 3-day intensive hands-on class on network security. I covered topics from: network intrusion detection, privacy, and authentication mechanisms

**Instructor, Central American Telecommunication Videoconferencing**, Summer 1996

**Experience:** Teaching Linux (Operating Systems), C++, and Networking seminars to engineers all over Central America (Remote teaching)

**Central American Telecommunication Commission**, Network Engineer, Tegucigalpa, Honduras, August'95-May '97

## Research Experience

**Research Assistant**, University of Florida, Gainesville, FL, Jan'00 – Aug '02

**Experience:** I investigated the effects of handoff and network mobility at different vehicular speeds. I used Mobile network simulation and emulation were important tools to study Mobile-IP and Layer-2/3 mobility protocols. I developed RAMON, Rapid Mobile Network Emulator, a device that emulates network layer mobility and programmatically replicates mobility conditions varying from signal strength, packet delay, BER, and speeds. RAMON uses real 802.11b Access Points, Omni-directional antennas, embedded computers (e.g. PC-104) and custom-build control circuitry. RAMON also used a .NET interface to automatically create network topologies to be emulated. In depth routing protocols explored, IP tunnels, and low-level network device driver adjustments. I conducted extensive simulation work on ns-2

**Research Assistant**, University of Florida, Gainesville, FL Sep.'97 - Dec. '99

**Experience:** I joined the High-performance Computing and Simulation Research Lab. During my thesis work, I applied Fuzzy Logic in Network Management, focusing on how adaptive sampling could reduce captured statistics without losing important network behavior. Additionally, I researched ATM networks, SNMP (Simple Network Management Protocol), Virtual Interface Architecture (VIA) over Myrinet, CORBA, and High-performance Cluster Computing topics.

**Program Manager Intern**, Microsoft Corporation, Redmond, WA, May - September'01

**Experience:** As an intern, I investigated self-similarity and power management algorithms for Wireless Networks. I modeled the method how service time per packet could be estimated and used for QoS in ad-hoc and infrastructure networks.

**Network Engineer**, Radiografica Costarricense, R&D, Costa Rica. January-July'95

**Experience:** I developed a microcontroller-based (x8051 and RUPI-51 micro-controllers) system to measure X.25 and PBX data traffic, Windows-based GUI, and X.25 frame captures
