

Swiss Engineering Meets Silicon Valley

MEVIAOS

The Zero-Friction Decentralized Operating System.

Unlocking the MEVIAVERSE of Multimedia & IoT.

Dr. Edwin Hernandez | EGLA CORP
www.eglacorp.com | @eglacorp

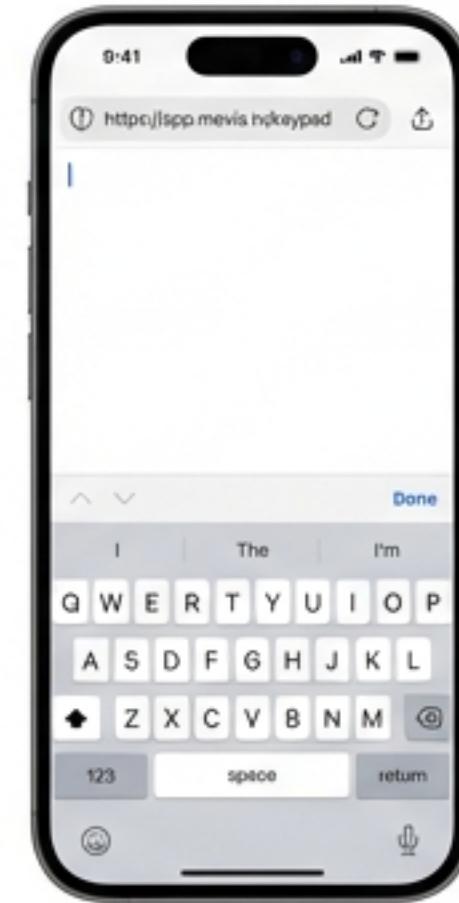

The “10-Foot UI” is Broken.

Smart TVs are “dumb” terminals trapped by legacy hardware

The Legacy Friction

The Mobile Opportunity

The Interaction Gap

7.2 Billion mobile devices
vs. clunky IR remotes and
expensive dongles

High Latency

Standard casting suffers
from lag, making real-time
gaming impossible

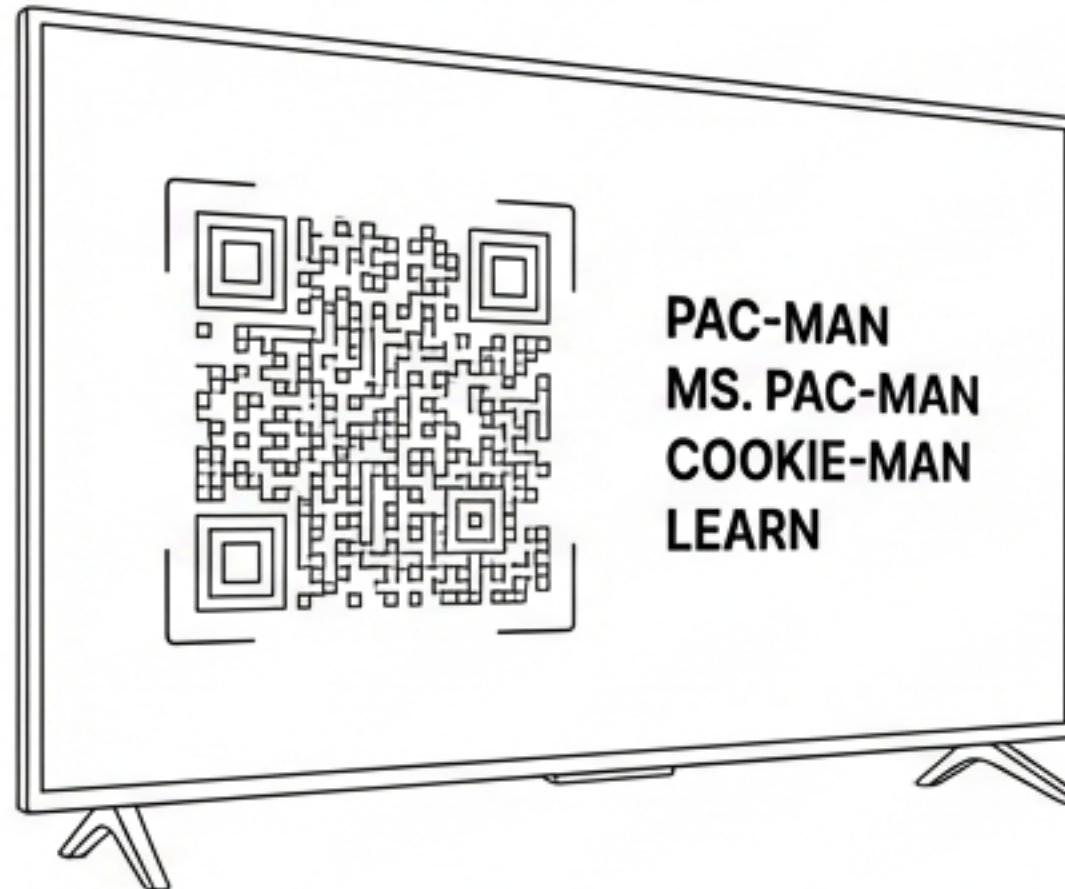

The Walled Garden

Proprietary ecosystems
(Apple, Google) fragment
the user experience

Zero Installs. Zero Friction. The Web is the OS.

No App Store. No Downloads. Just Web Standards.

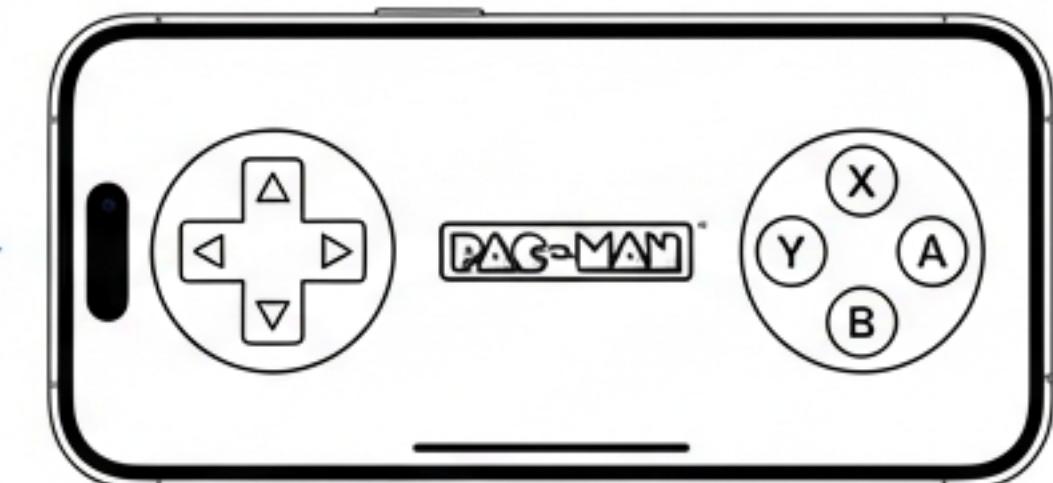

1. CONTEXT

2. HANDSHAKE.

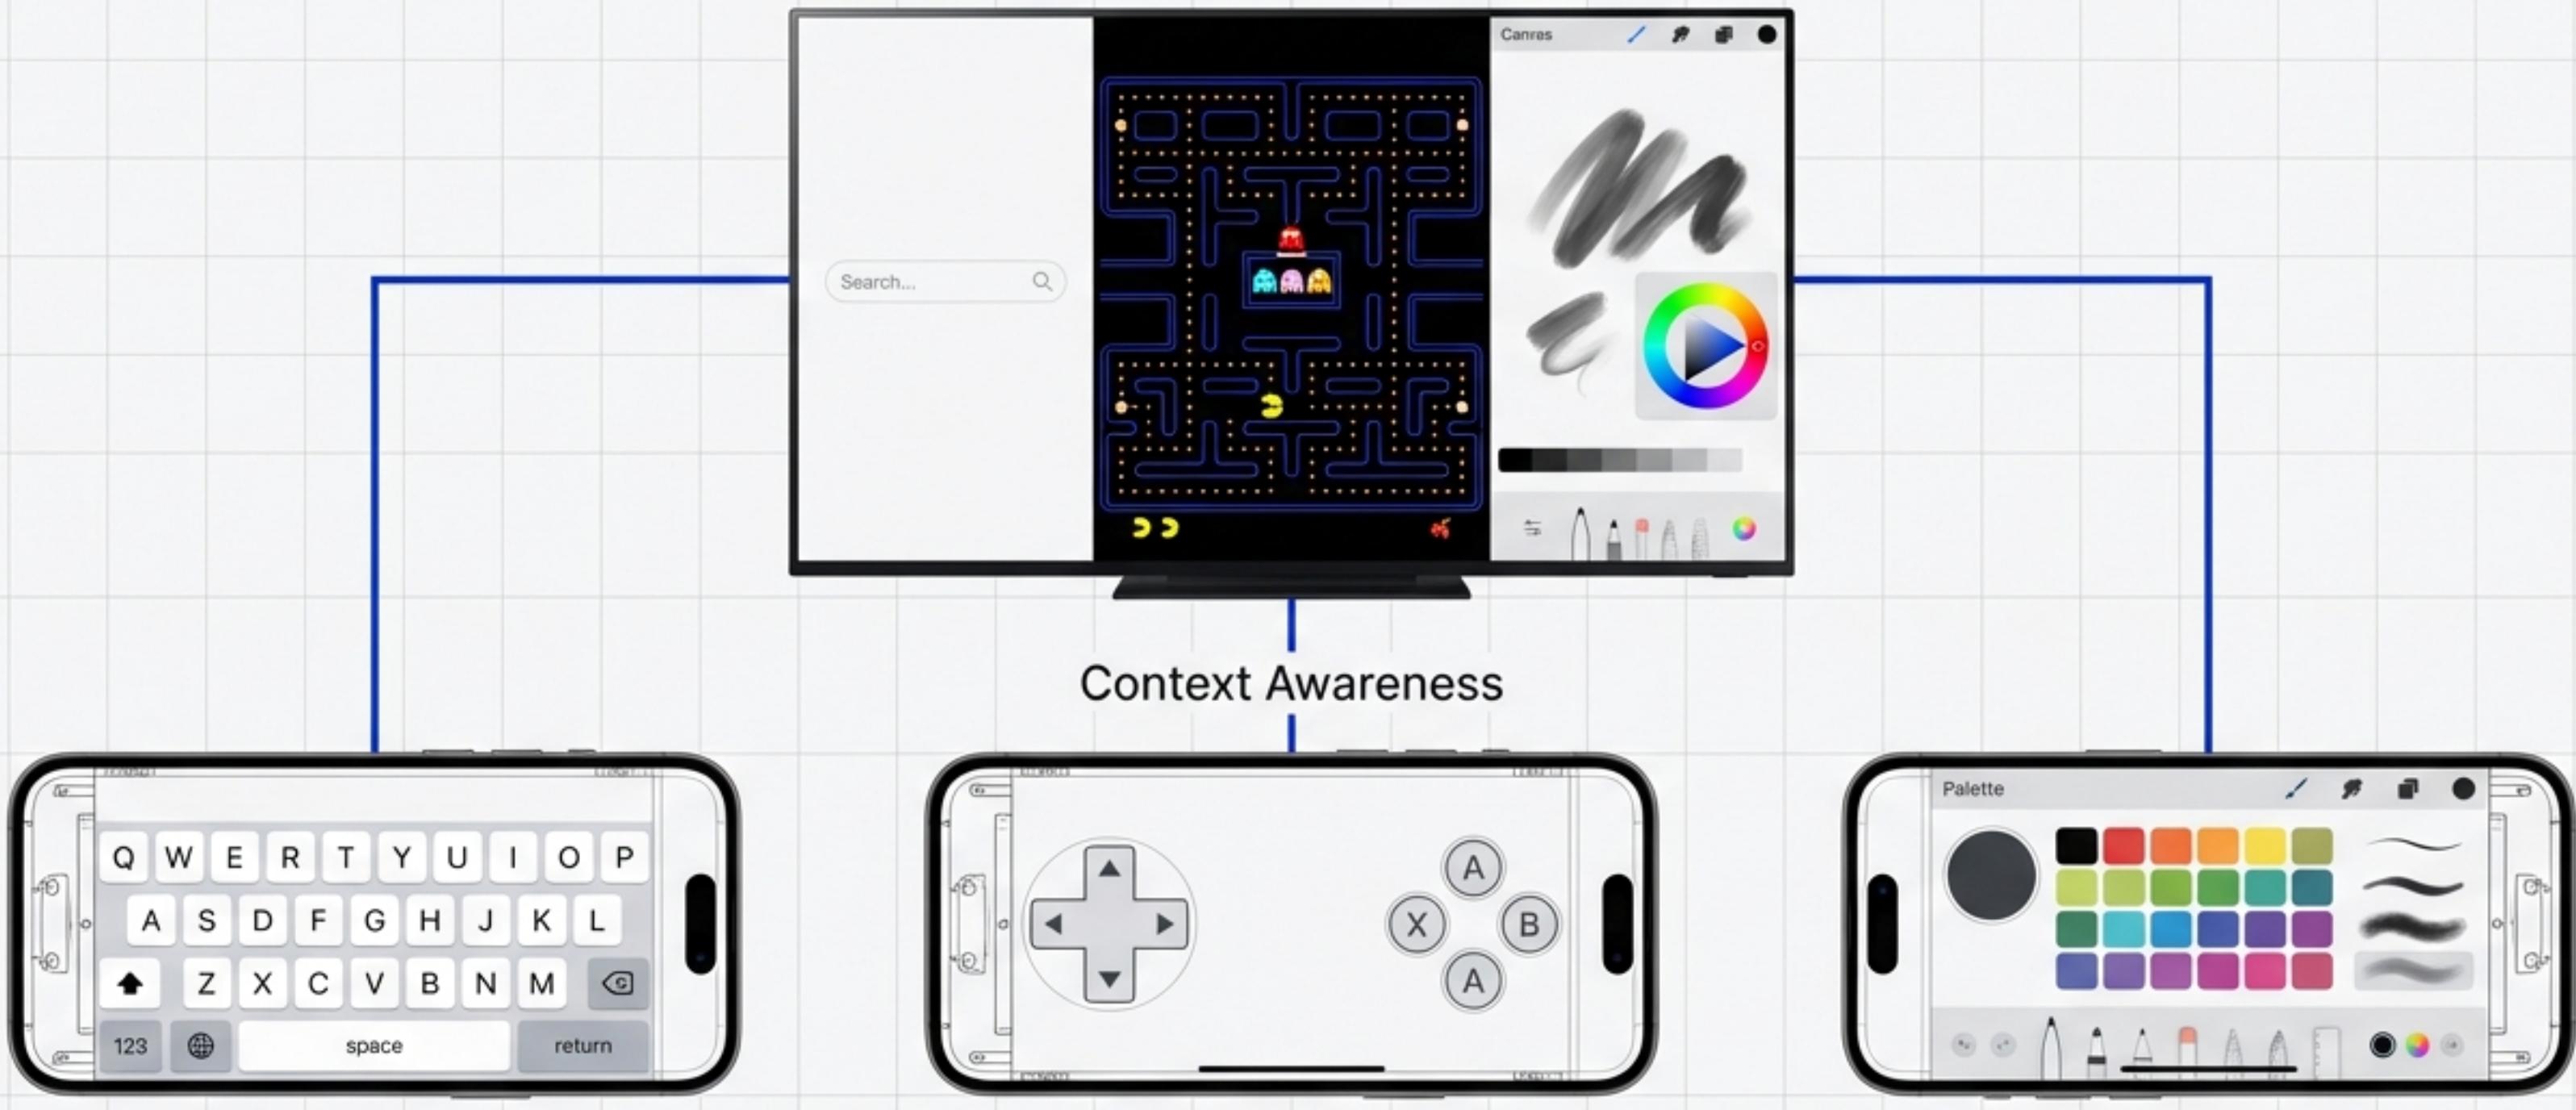

3. TRANSFORMATION.

Time to Interaction: < 3 Seconds

Decentralized Architecture: Transforms any mobile device into a context-aware controller instantly via QR code. Uses HTML5 and WebSockets. No App Store downloads required.

One Device. Infinite Interfaces.

Productivity Mode

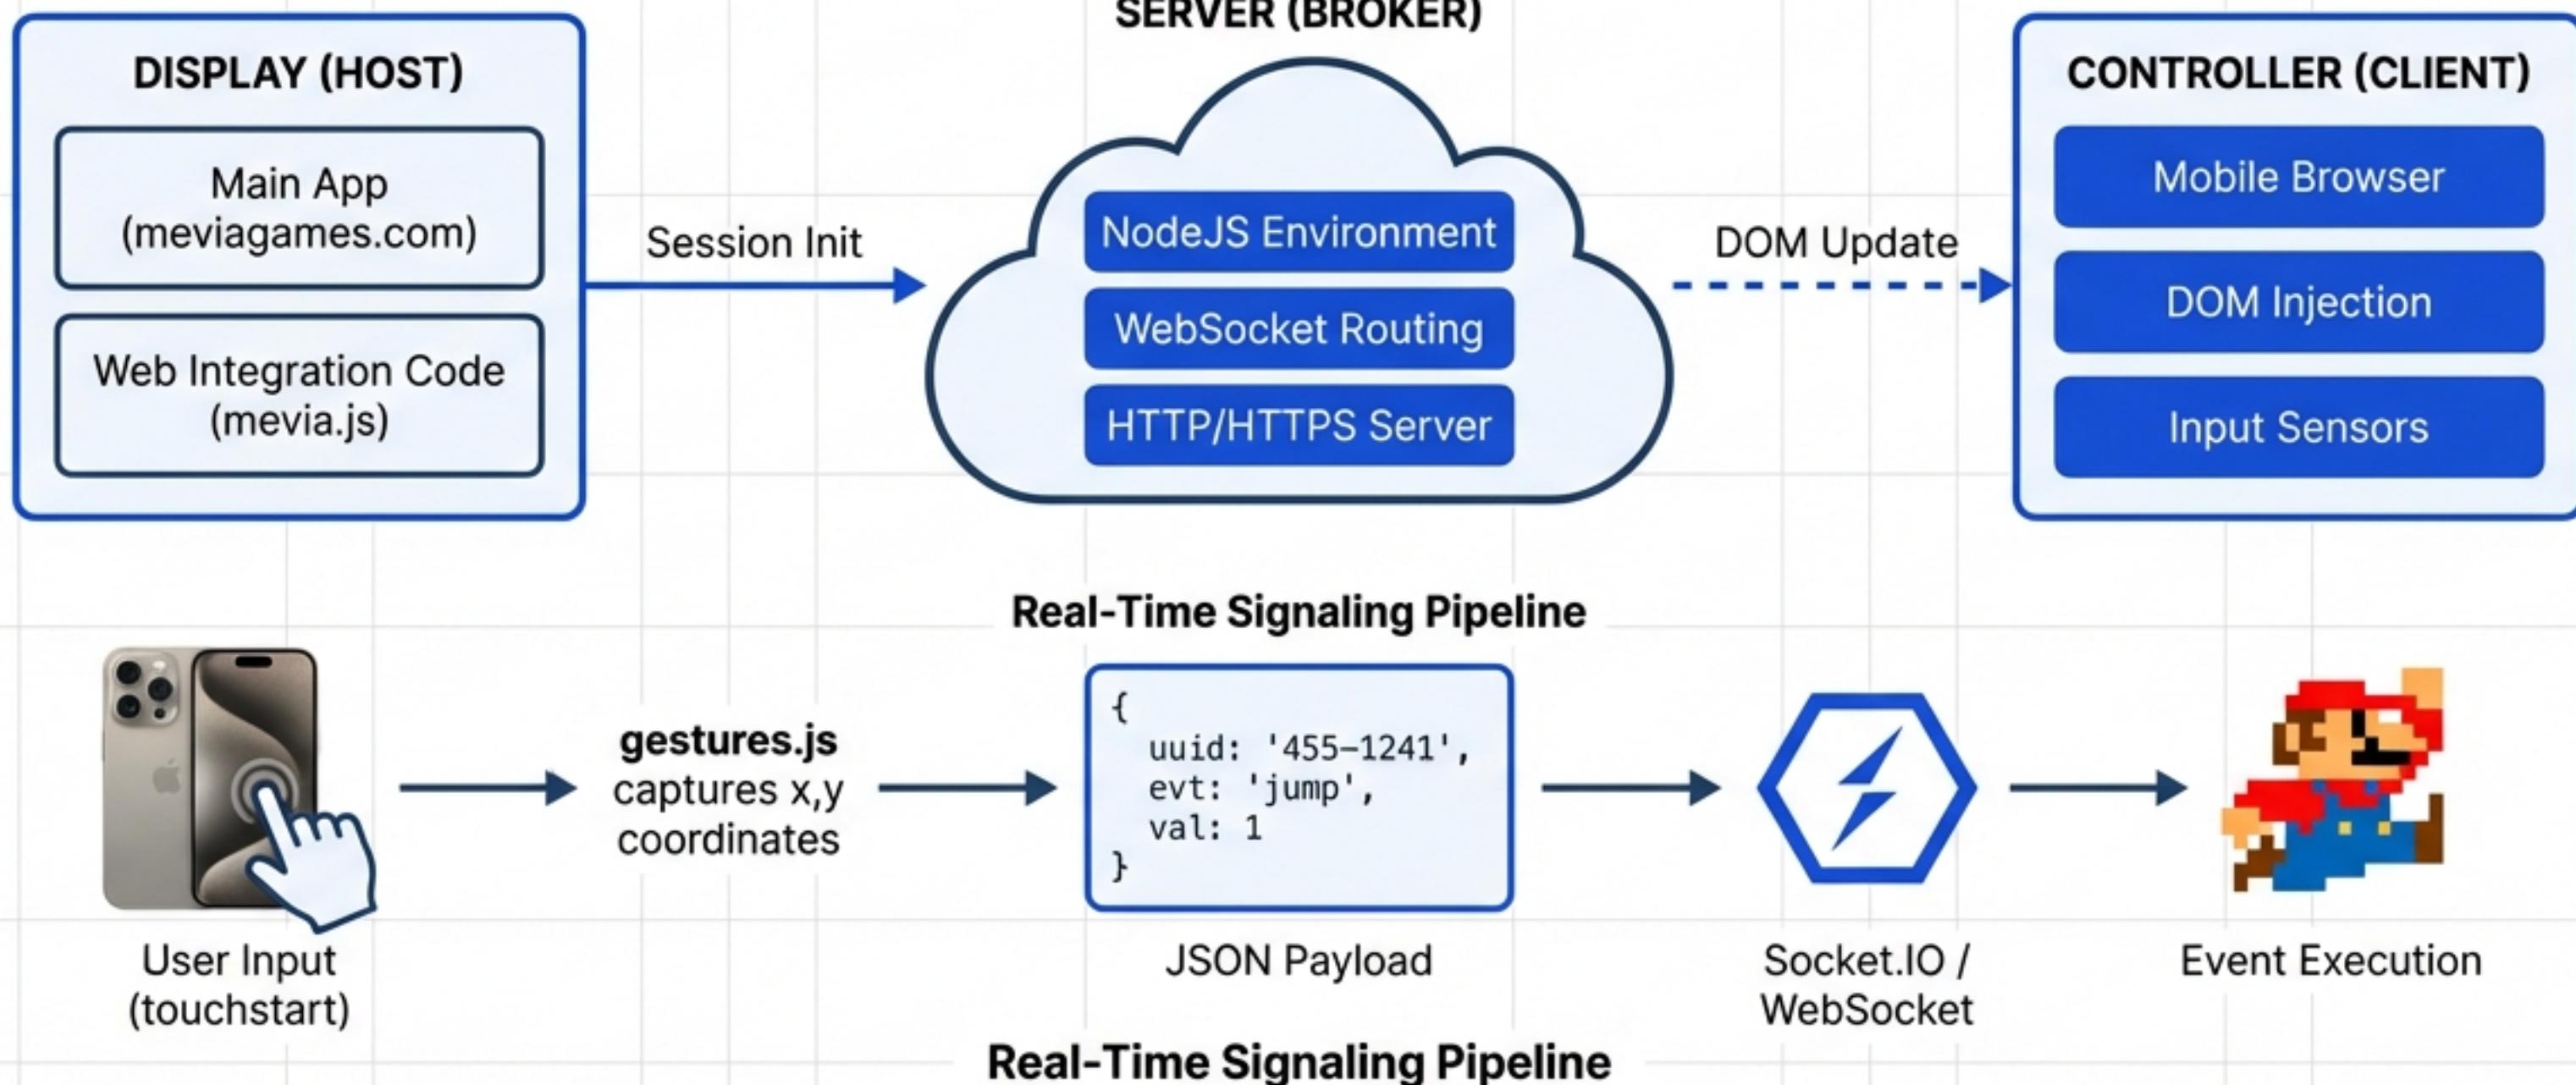

Gaming Mode

Creativity Mode

Dynamic DOM Injection: The server intelligently rewrites the phone's interface logic in real-time.

Native Biometrics: Uses FaceID/TouchID for secure commerce.

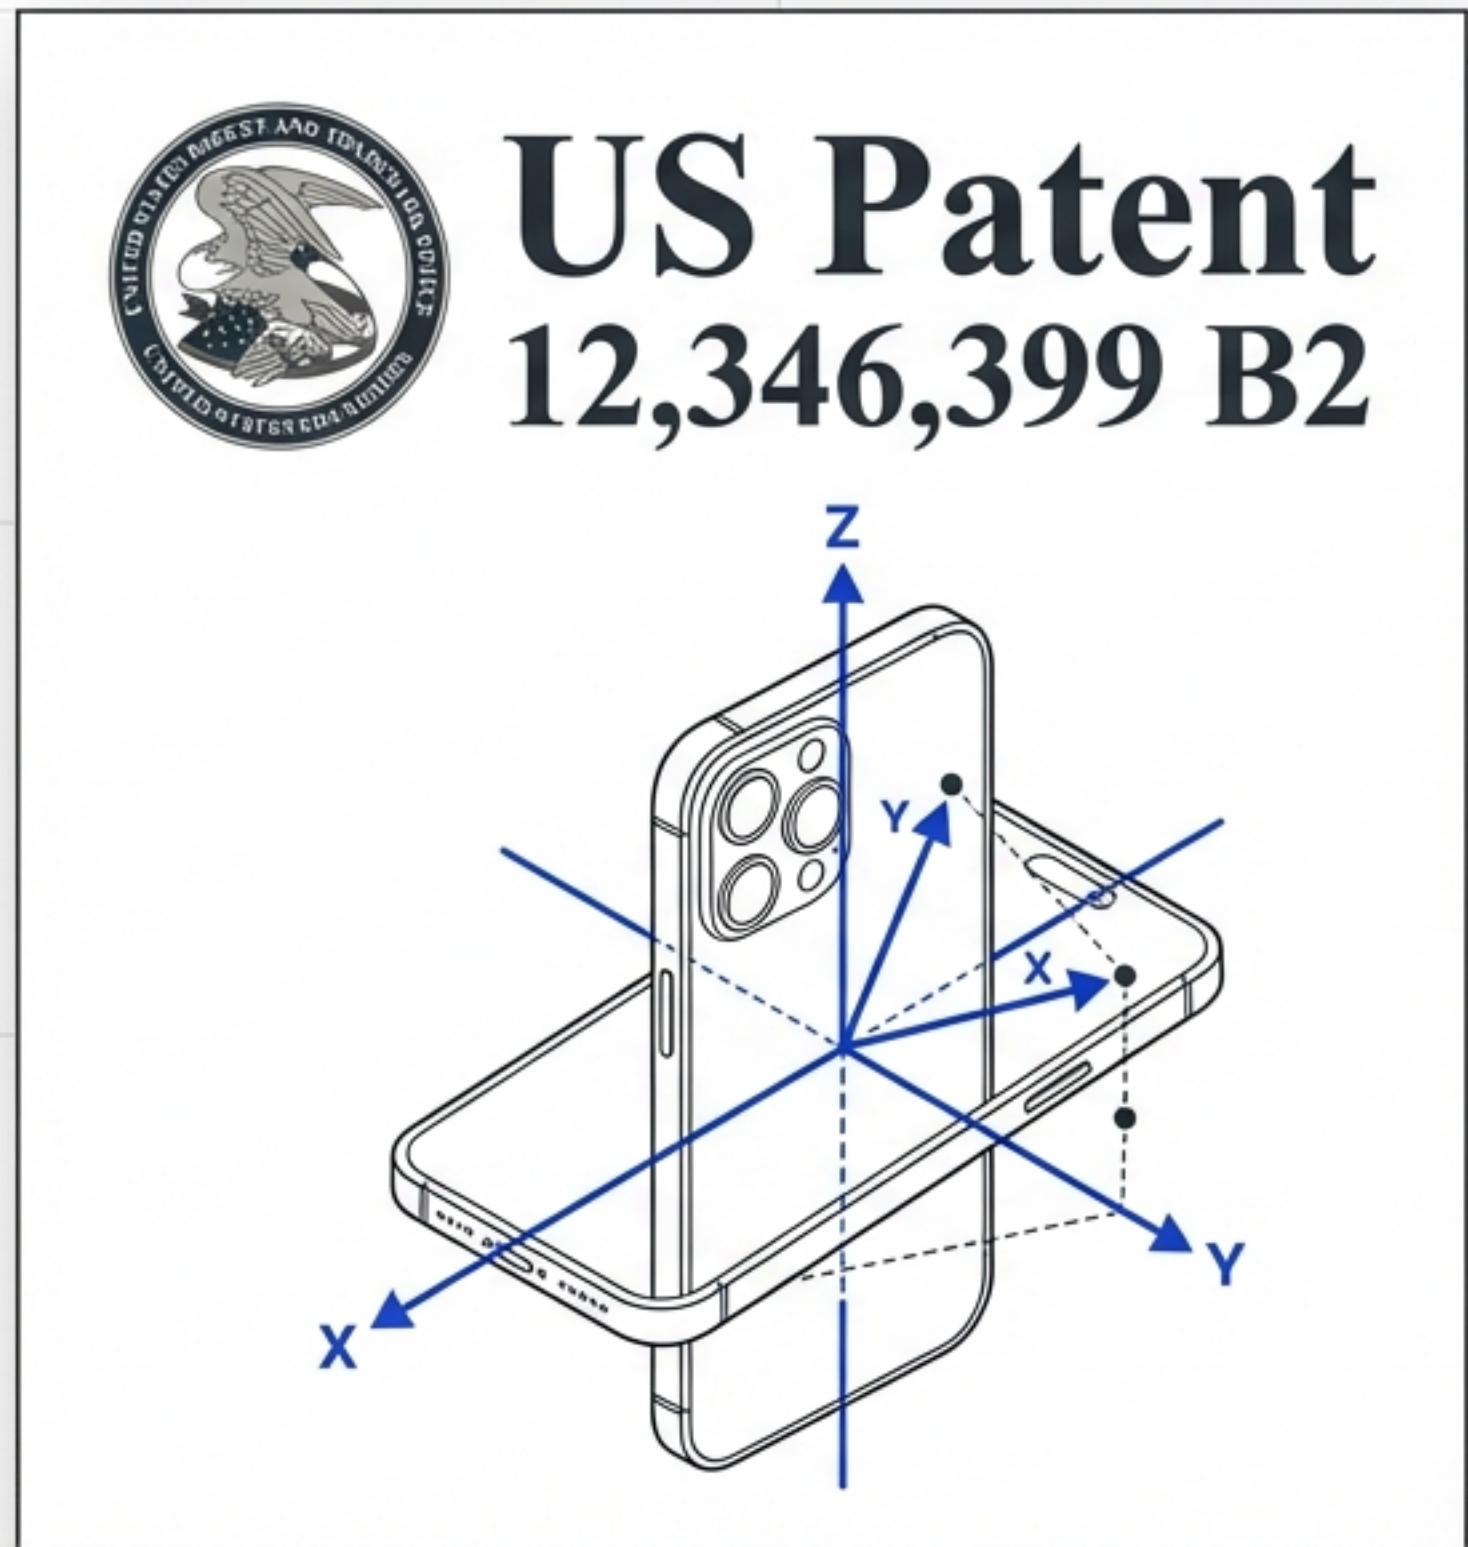

Deep Tech Architecture: The Cloud Broker & Neural Networks.

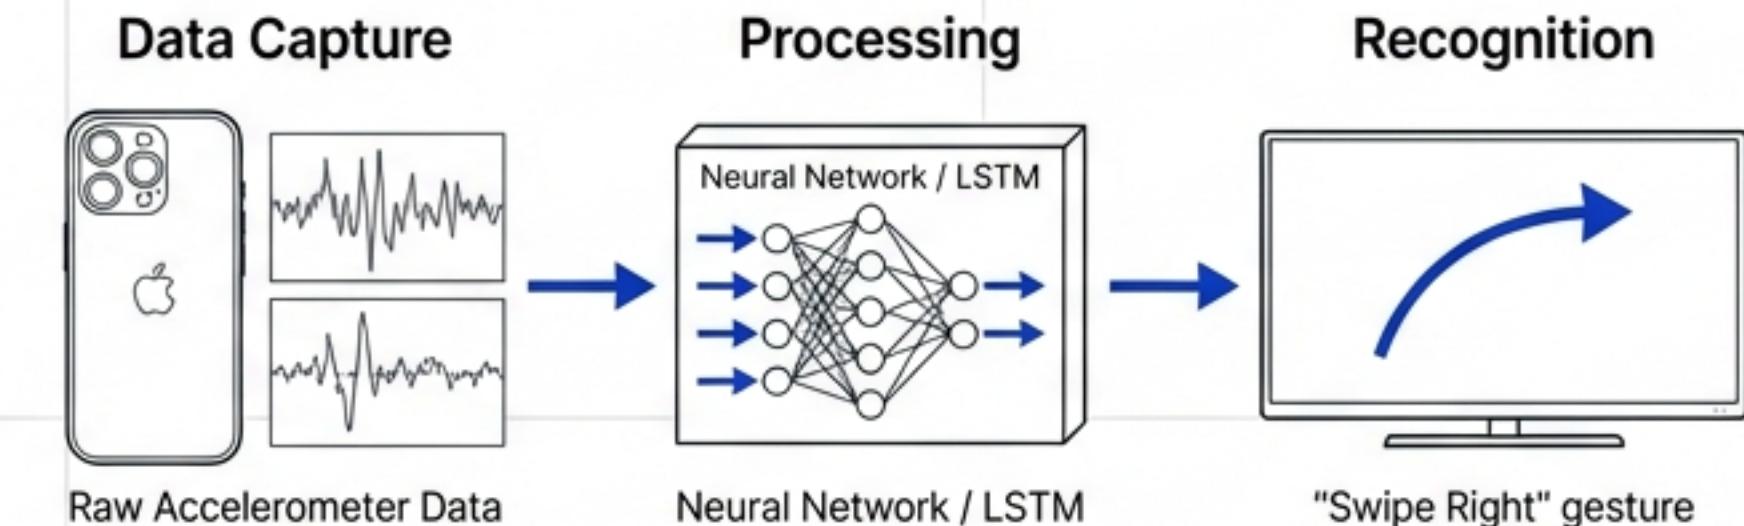

Real-Time Signaling Pipeline

- **NodeJS Environment:** Manages handshake.
- **WebSocket Routing:** <20ms latency.
- **WebRTC Tunnel:** Direct peer-to-peer media streaming.

A Defensive Moat Built on Physics & IP

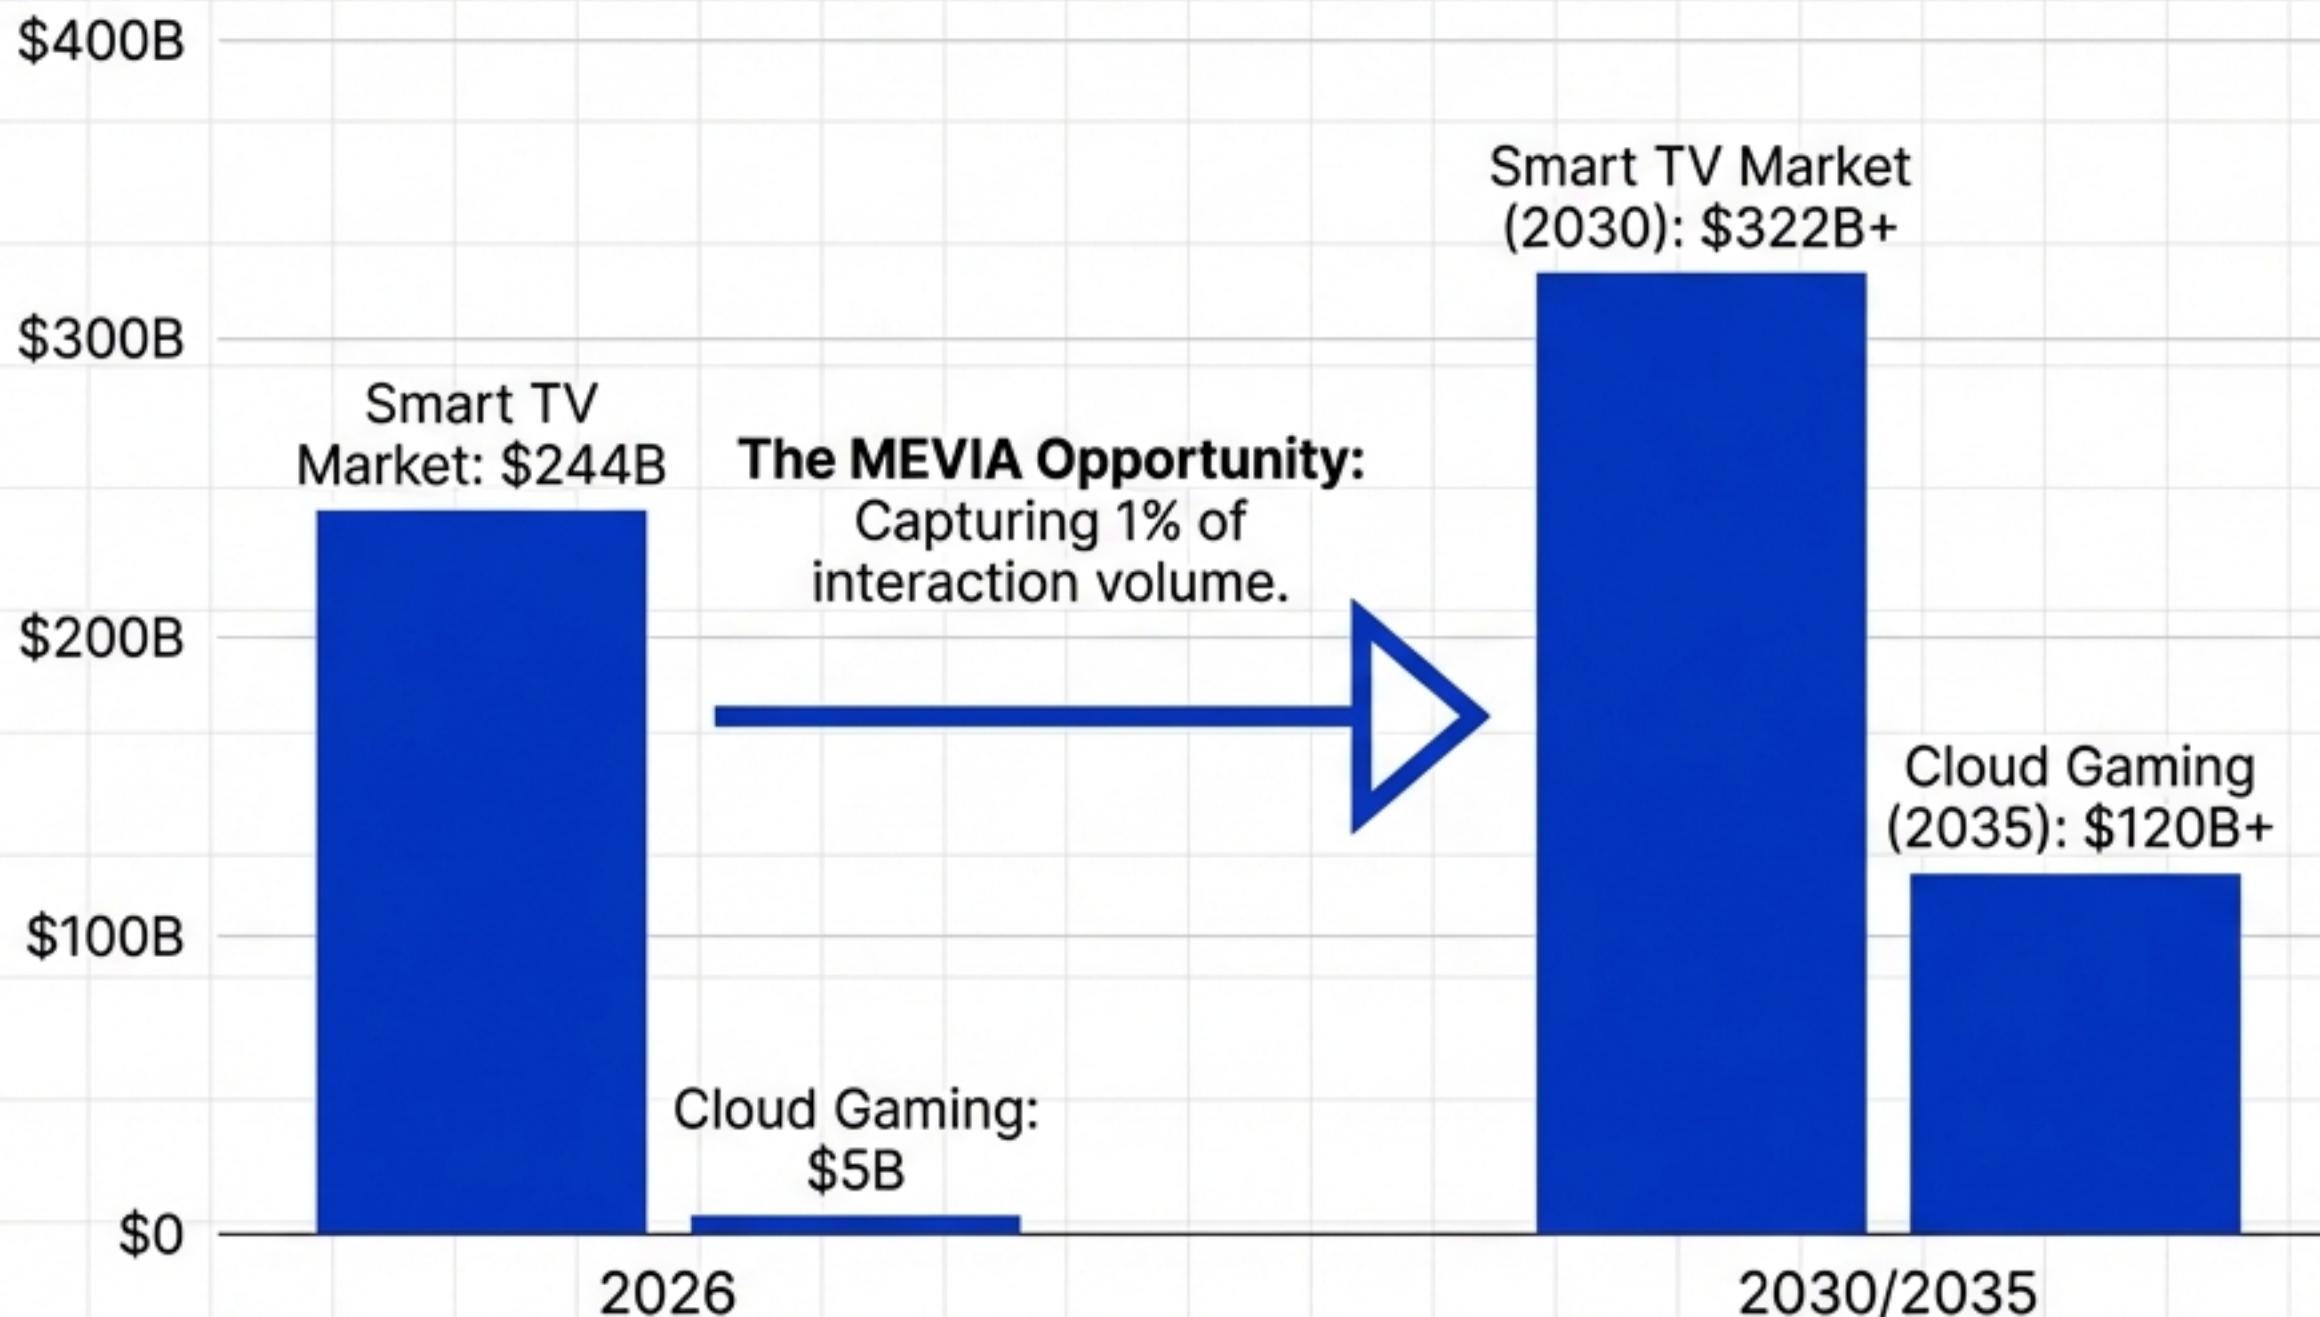

Advanced Input

- **Core IP:** Web-based remote display control and browser-to-browser messaging.
- **Neural Networks / LSTM:** Translates raw accelerometer data into precise 3D gestures.
- **Differentiation:** Enables Wii-like motion control via standard mobile browsers.

Converging Trillion-Dollar Markets

Total Addressable Market Growth (2026-2035)

- **Trend:** 6.4% CAGR in Smart TVs.
- **Explosion:** 43% CAGR in Cloud Gaming.
- **Synergy:** The shift to cloud streaming demands a zero-install controller.

Diversified, Scalable Revenue Streams

Licensing (Primary)

Patent royalties from TV manufacturers (Samsung, LG) and App Developers (1-2% fee)

Subscription

Freemium for basic access; Premium tiers (\$5-10/mo) for advanced AI gestures

Ecosystem Commission

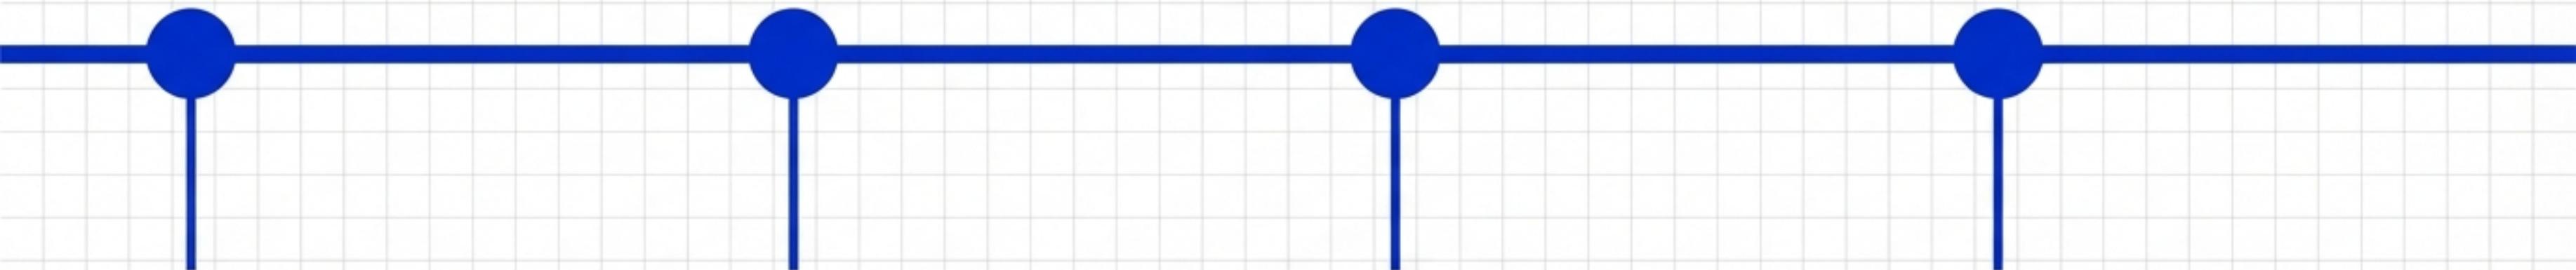

20% take rate on 3rd party controllers and apps in the MEVIAVERSE

Data Monetization

Anonymized usage analytics and insights

From Innovations to Validation

IP Secured

US & European
Patents Issued.

US Patent
12,346,399 B2

Proof of Concept

[Miami NFT Event](#)
(April 2021).
Live demo of
decentralized NFT
Lab app.

Product Development

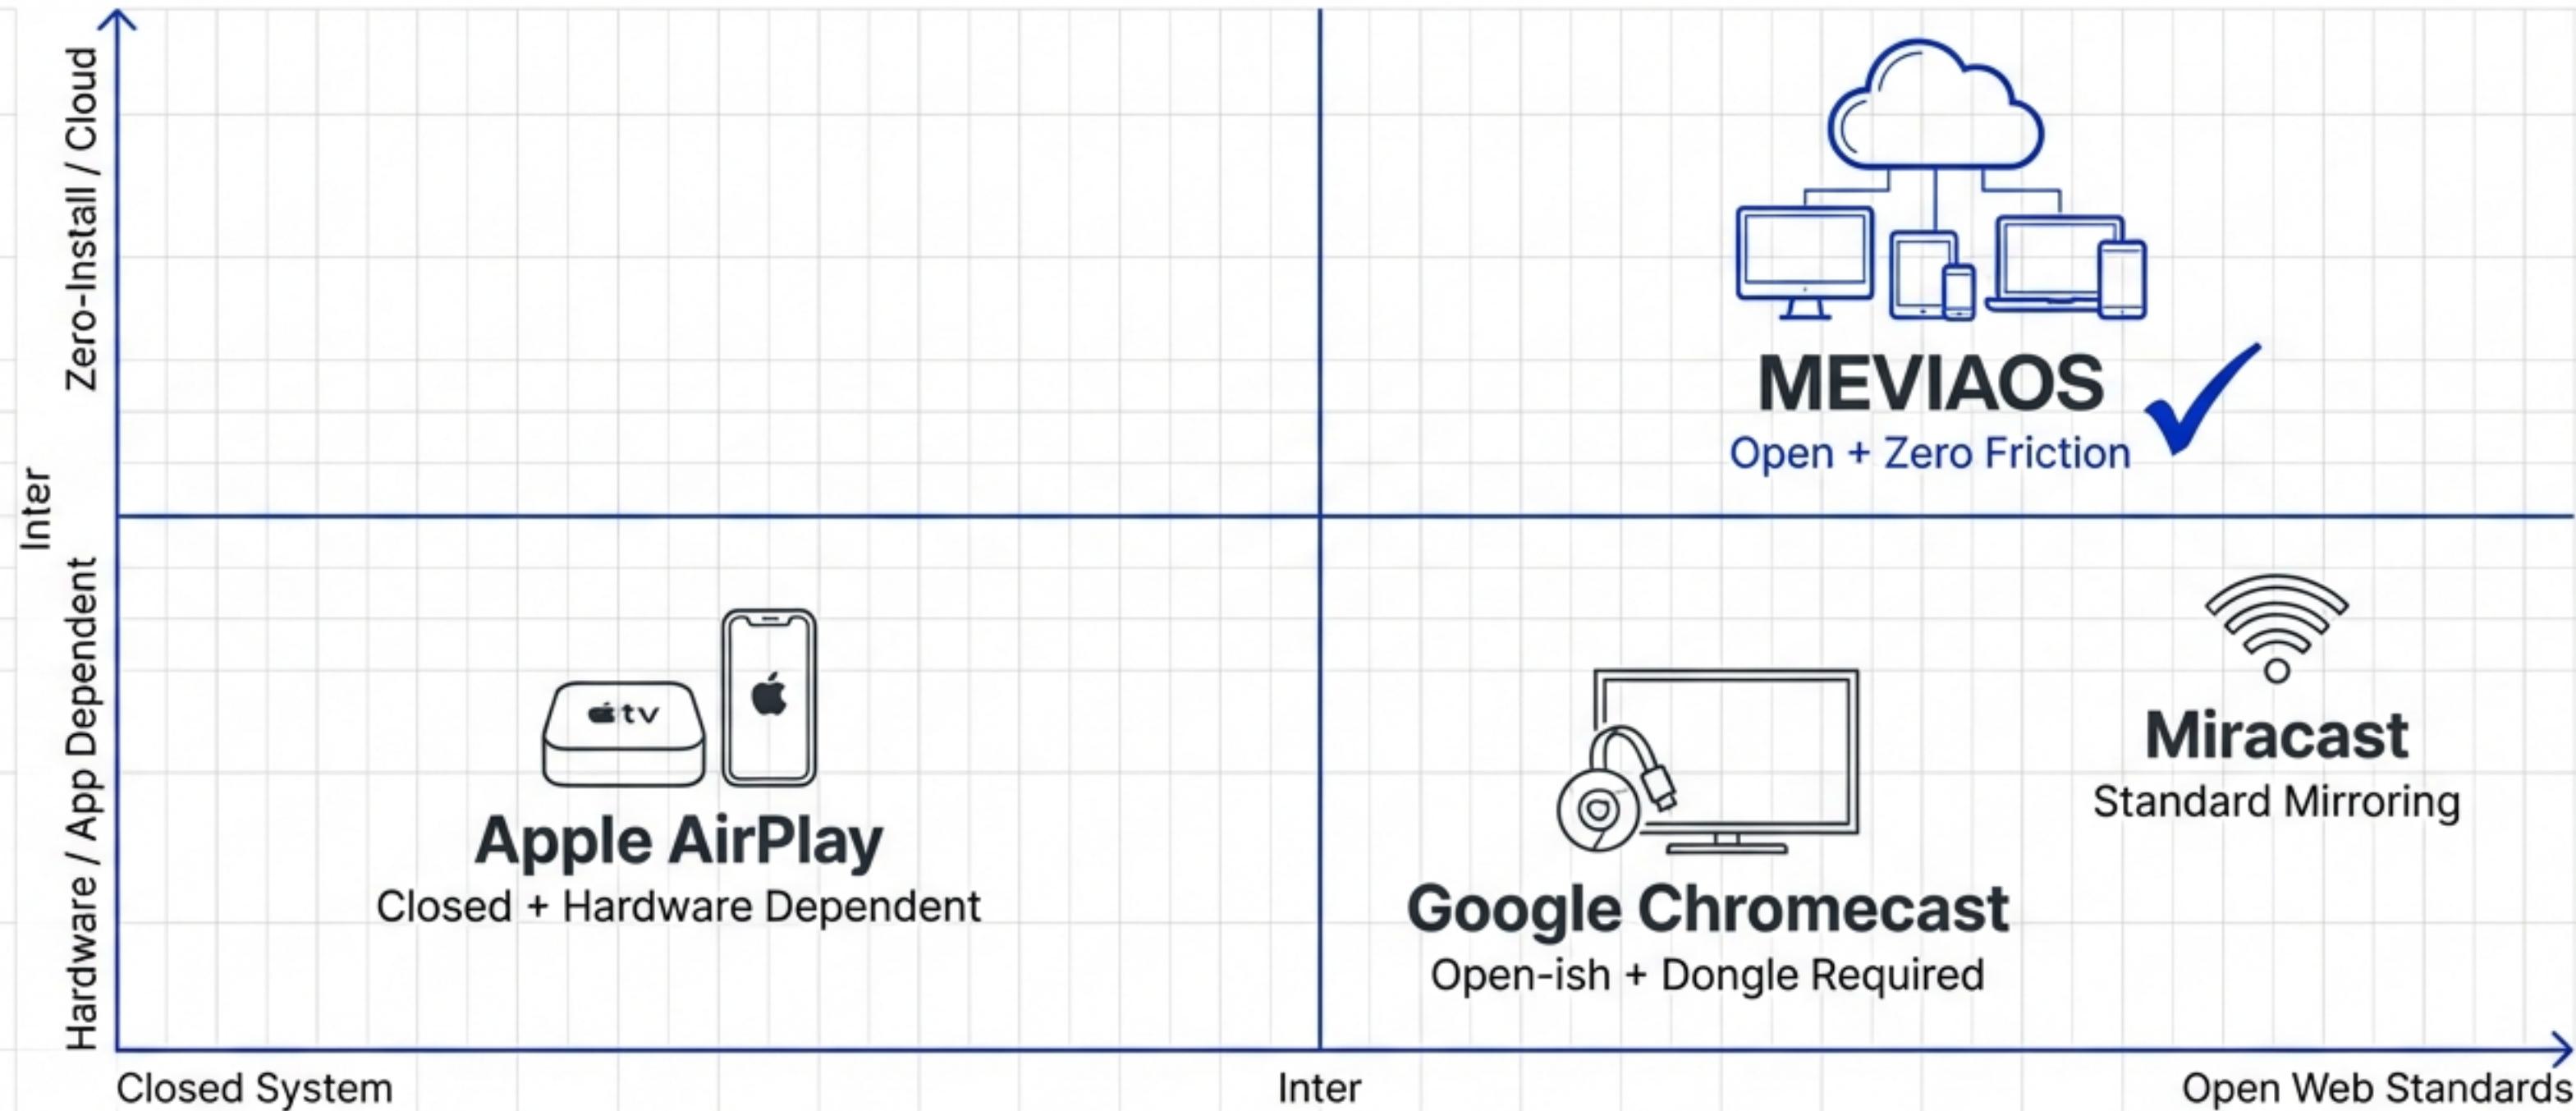

Functional
prototypes for
“Mevia Games”
and “NFT Museum”.

Valuation Report

Independent
Valuation
Baseline:
\$50M - \$100M

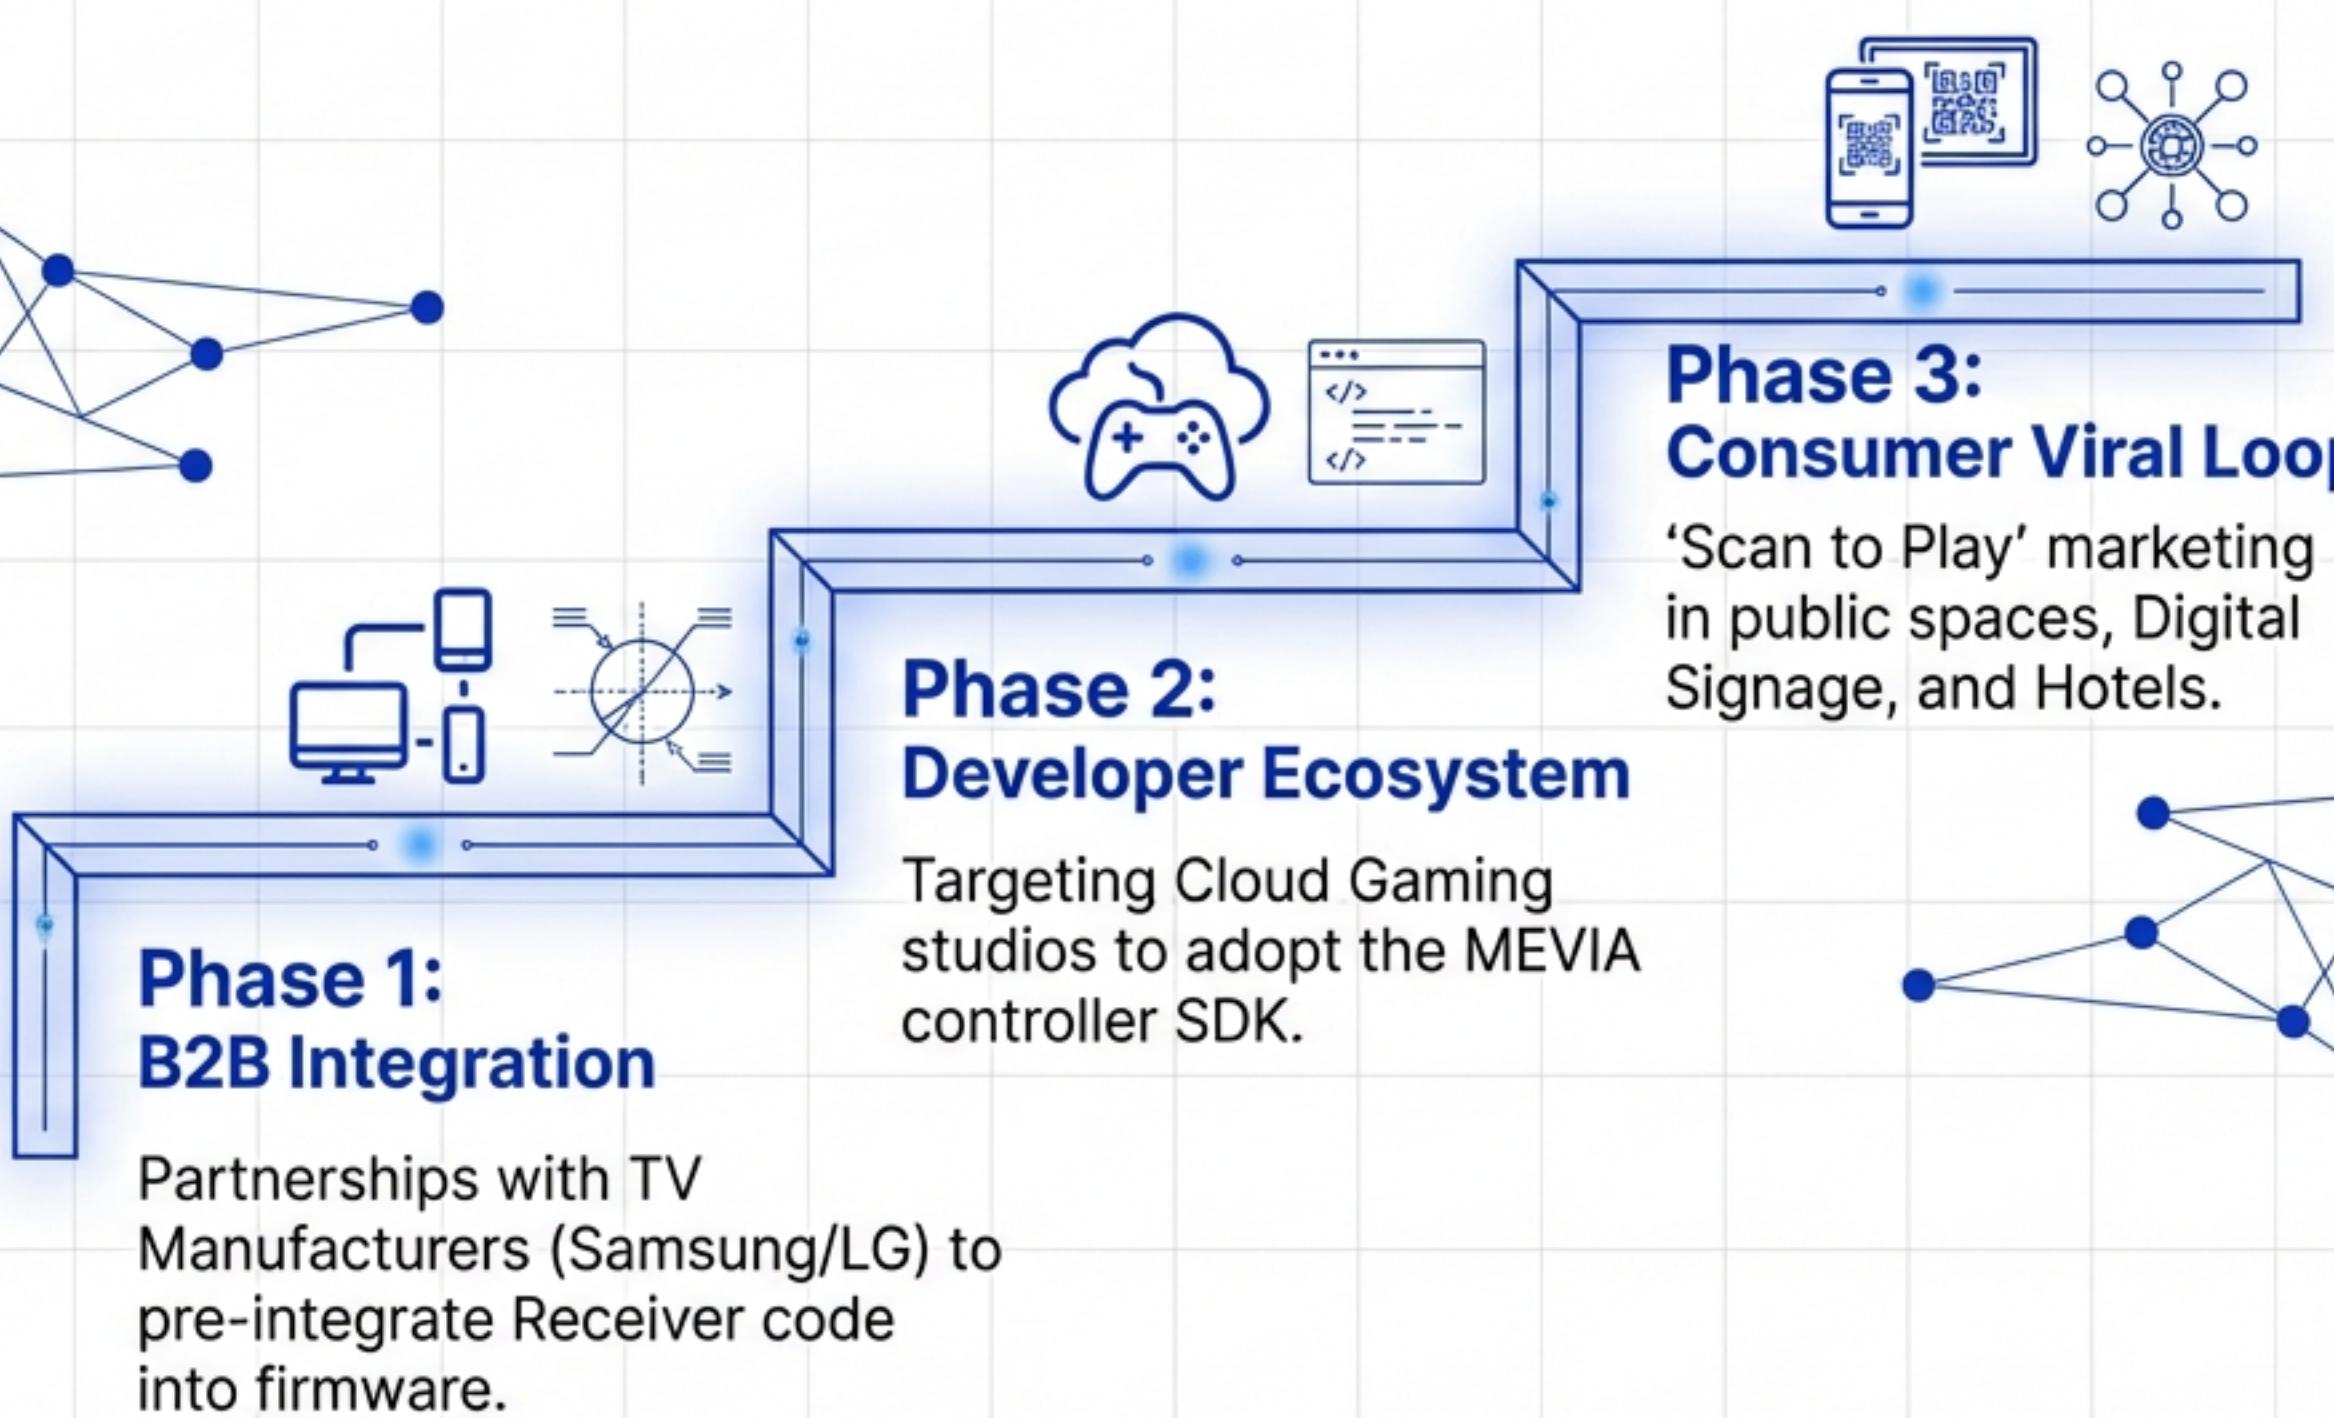

Why We Win Against the Giants.

MEVIAOS requires **NO hardware dongles** and **NO app installation**.

Strategy: Embedding MEVIAOS into the Web Fabric

Deep Tech Expertise & Legal Fortitude.

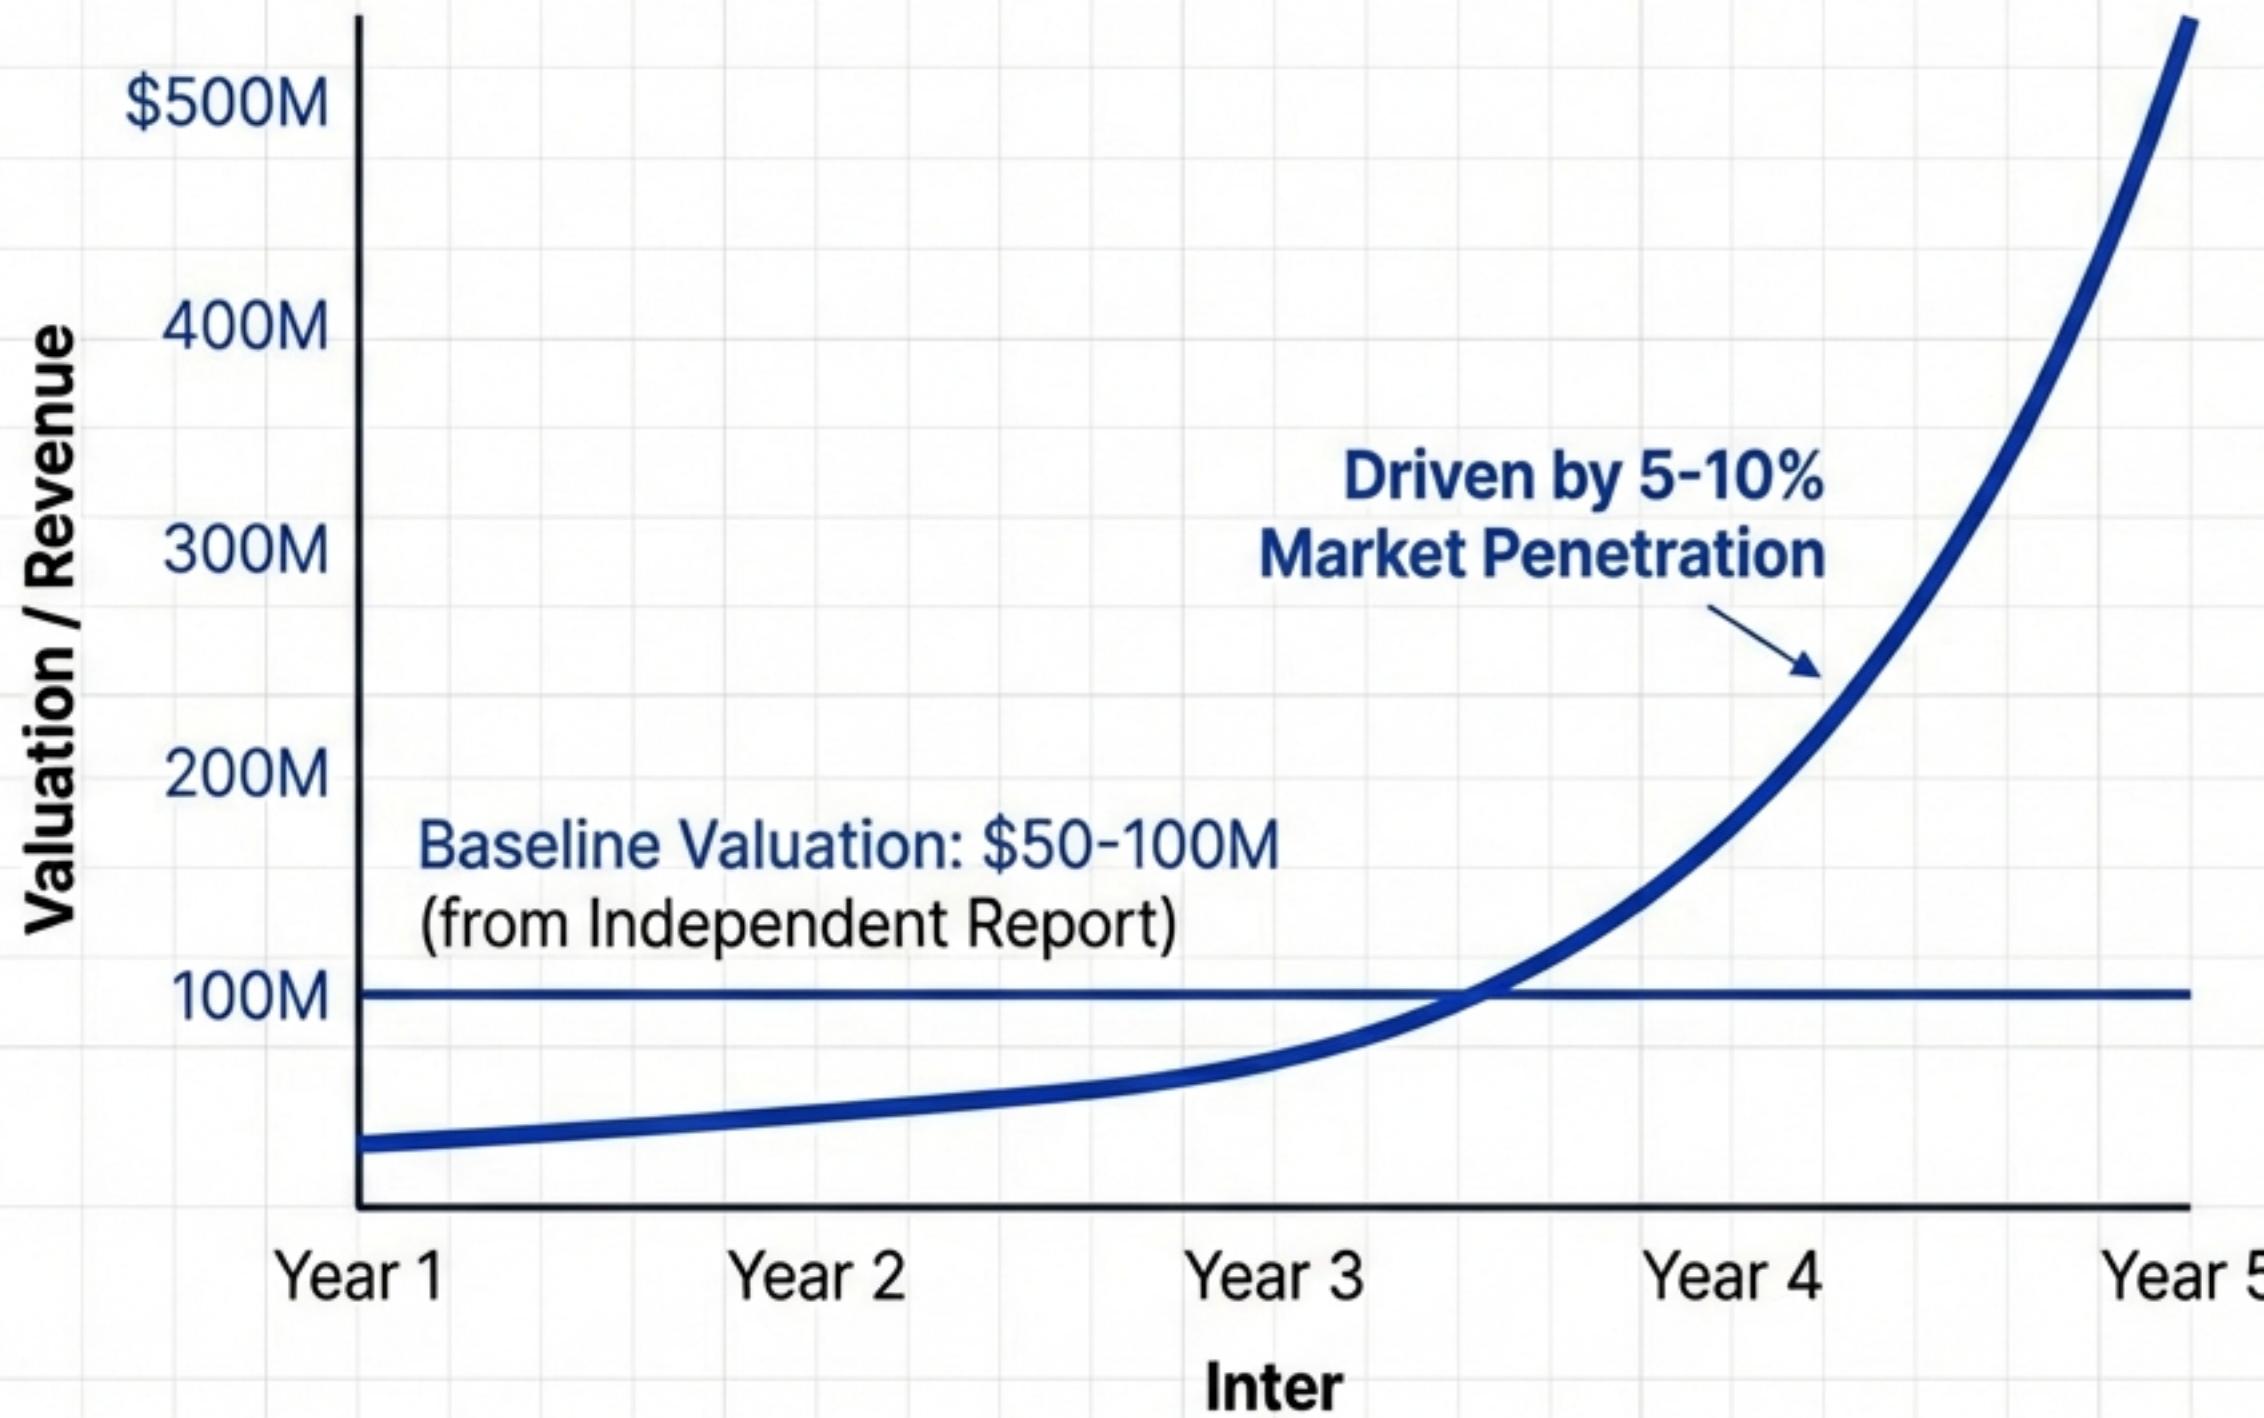

Dr. Edwin Hernandez
Founder & Inventor

- PhD in Computer Engineering.
- Expert Witness in major IP litigation, specializing in patent valuation and monetization.
- Proven track record in Wireless and Mobility sectors (EGLAVATOR).
- Unique advantage: The engineering capability to build neural networks combined with the legal expertise to defend the patent portfolio.

Financial Projections: The Path to \$500M+.

Assumptions: Based on modest royalty capture (2-5%) from the \$244B Smart TV market.

Capital Efficiency: Conservative burn rate focused on R&D and IP defense.

Investment Opportunity

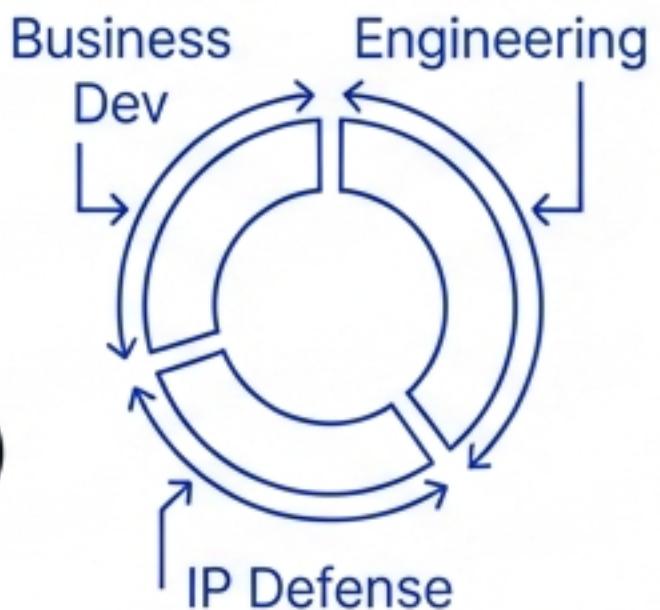

Equity Investment

Raise: \$10M

Valuation: \$200M Post-Money

Use of Funds:

- **40%** Engineering (Core OS & AI)
- **30%** Business Development (OEMs)
- **30%** IP Defense

Strategic Package

Total: \$30M

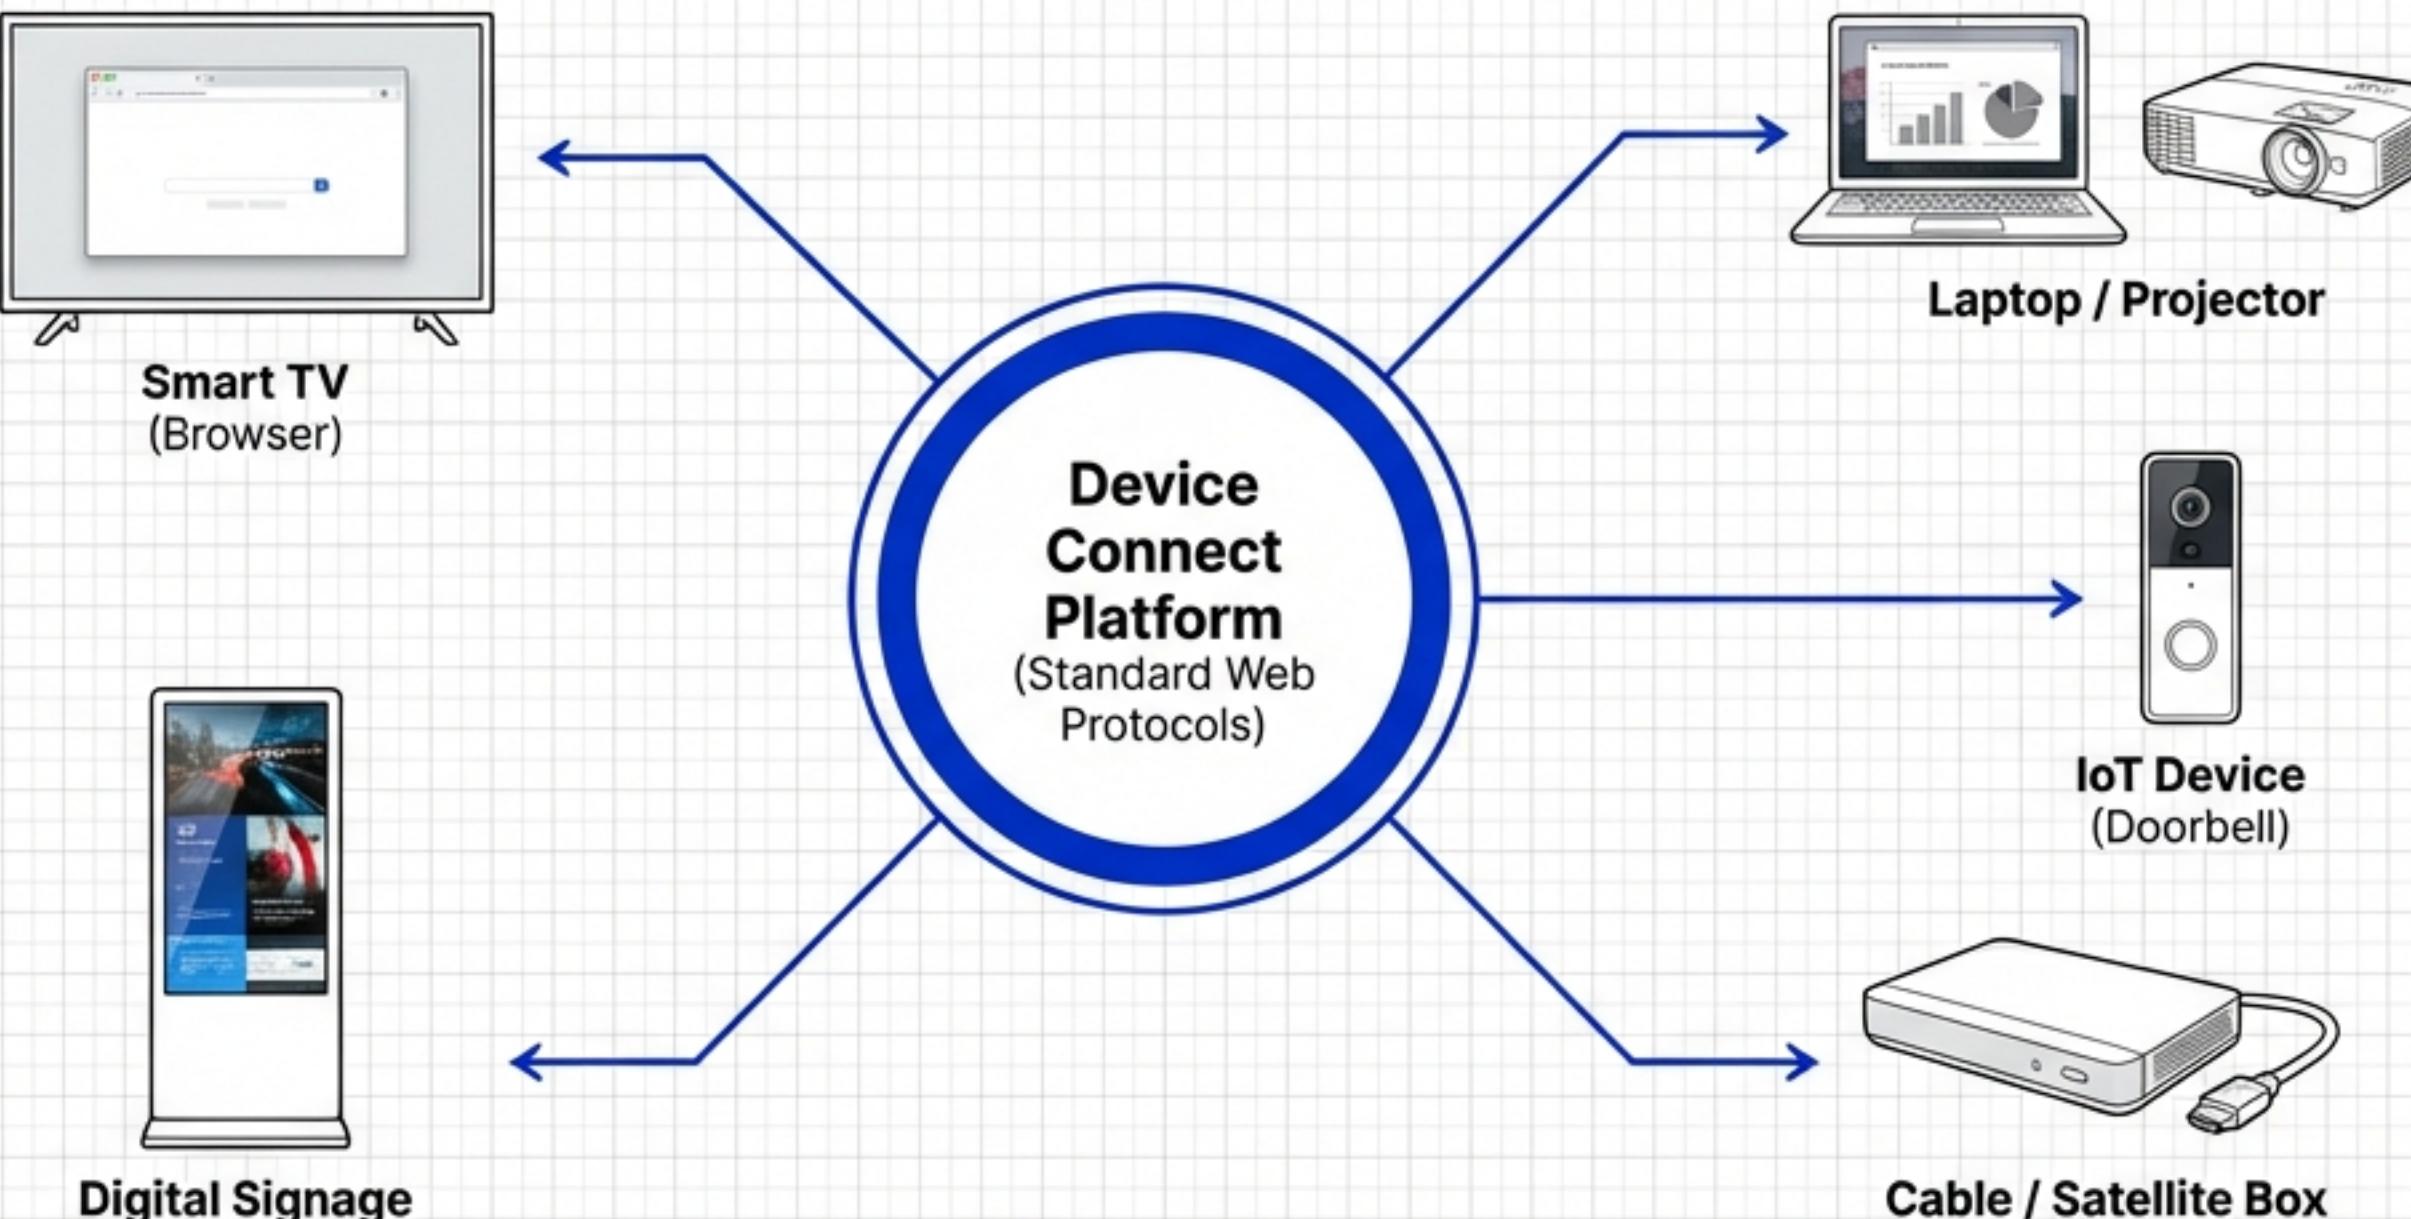

Includes: \$10M Equity Round

Plus: \$20M Non-Exclusive License to Patent Portfolio

Immediate Access to IP Assets.

Join the Zero-Friction Revolution

We are building the connecting fabric for the next era of computing. Any Device. Any Screen. Instantly.
